

SERVICE & RENTING

LASER CLEANING SOLUTIONS

ADDRESS

LOCHTEMANWEG 88, 3550
HEUSDEN-ZOLDER

INTRODUCTION

P-Laser is the European market leader in the development and production of laser cleaning machines. That is why we can also offer the **largest rental fleet**. We offer **different types of models** that can be rented for different periods. We offer, with the rental of the machine, **free training on safety, use of the machine and maintenance**.

ABOUT US

Kenneth Luys
Service technician

Jeroen Verbeeck
Supervisor Operations &
Safety

We have a passionate team that works every day to deliver the best results. You are supported by experts in electronics & mechanics who know their trade through and through.

THE TEAM

WHAT WE DO?

The most common reasons for renting a laser from P-Laser are the following:

- You want to rent a laser sporadically (monthly/yearly) to clean your machines during production downtime.
- You are working on an innovation project and you want to assess its feasibility by using a laser in the workplace for a few days or weeks.

THANK YOU, AND WE
LOOK FORWARD TO
WORKING WITH YOU.

RENTING PRICES

TYPE OF UNIT	PRICE PER DAY	PRICE PER WEEK	PRICE PER MONTH
QFC-100	€550	€1.430	€4.950
QFC-200	€750	€1.980	€7.400
QFC-300	€950	€2.350	€9.700
QF-500	€1.500	€5.000	€19.500
QF-1000	€2.100	€7.200	€26.800

SERVICE ON SITE

Do you want us to perform the work on site? Totally possible!
We charge €95 per hour for this. We do not charge any transport costs within a radius of 50 km.

RENTAL FLEET

QF-500 | 1000

P-Laser's 500 - 2000 W systems are truly state-of-the-art machines that combine high pulse power with large surface coverage. The laser is controlled by a 19" control unit. To cool the optical components during operation, water cooling is integrated.

The series can be delivered in several configurations: a 500W, a 1000W or a 2000W laser source. They all work at the same pulse power, but the 1000W delivers double the amount of energy of the 500W to speed up the process, and the 2000W again doubles the energy of a 1000W system. An air treatment unit is integrated to cool down the optic and avoid dust onto the lens.

Measurements: 182cm x 77cm x 140cm

QFC-200 | 300

The QFC-200 & QFC-300 are versatile laser cleaning systems. It's portable, and the extendable handle and wheels allow for a hassle-free transportation.

QFC-100

With its interactive, state-of-the-art touch encoder, job selection has never been easier. As with every P-Laser system, 8 custom jobs can be selected with the rotative wheel on the encoder.

If you want to edit one of these jobs with our own software Cleansweep®, a wireless connectivity and a tablet will be at your disposal. No more need for cables, we like to make your lives easier.

Other key features of the QF-Compact include a quick startup cycle of around 10s and very low maintenance requirements. You will only need to replace the dust filter once in a while.

Coming in at 13 kg and measuring 485x225x330mm, it will be a solid competitor for years to come.
